

## 2. RUSTLE 3124

2.1 Mode

```
RUSTLE Login: switch

Welcome to "Rustle-3124"
Login O.K.(Type ? for help, Type CTL-C for interrupt.)

SWITCH> show
SWITCH(show)>>
SWITCH(show)>> exit
SWITCH> conf
Enter config password : ******
SWITCH(config)>>
```

## 2.2 Password

login password

```
SWITCH(config)>> password login  
Current Login Password : *****  
  
New Login Password : *****  
  
Re - enter : *****  
Password Updated !  
write_nv  
SWITCH(config)>>
```

config password

```
SWITCH(config)>> password config
Current Login Password : *****

New Login Password : *****

Re-enter : *****
Password Updated !
write_nv
SWITCH(config)>>
```

RUSTLE 3124

login password config password switch

### 2.3 Prompt

```
SWITCH(config)>> prompt TEST#1
SWITCH(config)>> logout
RUSTLE Login: switch

Welcome to "Rustle- 3124"
Login O.K.(Type ? for help, Type CTL-C for interrupt.)

TEST#1>
```

### 2.4

RUSTLE 3124 ? 가  
mode

Commands	Comments
=====	=====
?	Display all commands possible in current mode
help	Display all commands possible in current mode
exit	Exit from login, show, or config state
logout	Exit from system operating state
date	Show current date
telnet	Open a telnet connection
rlogin	Open a rlogin connection
pad	Open a PAD connection
ping	Send ICMP ECHO_REQUEST packets to network hosts
sping	Send ICMP ECHO_REQUEST packets to network hosts
runtime	Show system running time

user	Who is working on the system
show	Change to the show mode for system monitoring
config	Change to the privileged mode for system setup
trt	Print the route packets take to the network host

SWITCH> show

SWITCH(show)>> ?

Commands	Comments
=====	=====
?	Display all commands possible in current mode
help	Display all commands possible in current mode
exit	Exit from login, show, or config state
logout	Exit from system operating state
swport	Show Switch Port Configuration
vlan	Show Switch VLAN Configuration
trunk	Show Switch Trunk Configuration
portstat	Show Switch Port Statistics
stack	Show Stacking Status
spantree	Show spanning tree status
macvlan	Show assigned MAC addr in VLAN
mirror	Show current Mirroring status
ip	Show IP Mode
gvrp	Show GVRP
snprrtr	Show Repeat MIB set
Dumpmac	Show MAC Address
acceptmcast	Show Accept Multicast to CPU
<Space>	for next page, <Return> for next line <q> for quit: q

SWITCH(show)>> exit

SWITCH> conf

Enter config password : \*\*\*\*\*

SWITCH(config)>> ?
